

Create Flask Project

The screenshot shows the Visual Studio Code interface with a Flask application running. The Explorer sidebar on the left shows the project structure with files like `__pycache__`, `.vscode`, `images`, and `app.py`. The main editor displays the `app.py` file with the following code:

```
1 from flask import Flask
2
3 app = Flask(__name__)
4
5
6 @app.route('/')
7 def hello():
8     return 'Hello, World!'
9
10 app.run()
```

The TERMINAL panel at the bottom shows the output of the application:

```
* Debug mode: on
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
* Restarting with stat
* Debugger is active!
* Debugger PIN: 651-047-735
PS D:\IBM> & C:/Users/Dell/AppData/Local/Programs/Python/Python310/python.exe d:/IBM/app.py
* Serving Flask app 'app'
* Debug mode: off
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
127.0.0.1 - - [14/Oct/2022 12:04:15] "GET / HTTP/1.1" 200 -
127.0.0.1 - - [14/Oct/2022 12:04:15] "GET /favicon.ico HTTP/1.1" 404 -
```

The status bar at the bottom indicates the current line and column (Ln 10, Col 10), the file encoding (UTF-8), the file format (CR/LF), the Python version (3.10.4 64-bit), and the Go Live status.

Output :

Activate Windows
Go to Settings to activate Windows.
